

The 9th International Congress of Comparative Physiology and Biochemistry

FROM MOLECULES TO MACROPHYSIOLOGY
23-28 August 2015

**Thirty Symposia
and an Open Session**

Plenary speakers:

Kevin Gaston, University of Exeter
Michael Angilletta, Arizona State University
Theodore Garland, University of California
John R. Speakman, University of Aberdeen
Elżbieta Pyza, Jagiellonian University
Marek Konarzewski, University of Białystok

www.iccpb2015.confer.uj.edu.pl

Congress Chair:
Paweł Koteja

ICCPB 2015 facts:

International Congress of Comparative Physiology and Biochemistry has been organized every four years since 1983.

ICCPB 2015 puts emphasis on the integrated view of organisms –
From Molecules to Macrophysiology.

The meeting will be held at the Jagiellonian University, where Nicolaus Copernicus started academic education that led him to revolutionizing ideas about the Universe.

Thirty thematic Symposia and an Open Session:

Molecular and integrative physiology: homeostasis, hormones, genomes, trade-offs, telomeres, longevity

Neurophysiology: olfaction, chemical ecology, photoreception, enteric nervous system, monoamines

Physiology of biological rhythms: circadian clocks, photoperiodism

Energetics and temperature: avian flight, cardiorespiratory functions, endothermy, performance, metabolic scaling, body size, cell size, oxygen limitation, phenotypic plasticity, seasonality

Stress physiology: cellular stress, oxidative stress, life history, innate and acquired immunity

Miscellaneous: fatty acids, actin and actin-binding proteins, statistical analysis of physiological data, biosensors

Important deadlines - 2015:

Registration:	Early – 14 April	Regular – 30 June	Late – 31 July
Abstract submission:	Early – 15 March	Regular – 15 June	

Welcome to Magical Kraków:

1000 years preserved in unique architecture and museums

1000 pubs, restaurants and night clubs
